

CALL FOR PAPERS in the special session

Computer and network Applications in Agriculture

within the

International e-Conference on Computer Science 2006 (IeCCS 2006)

Topics:

- Agricultural decision support system and expert system
- GIS, GPS, RS and Precision farming
- Agricultural System simulation
- Intelligent monitor and control
- Software Engineering
- ICT applications in rural area

Organizer:

Prof. Daoliang Li, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn

Phone: +86-10-62736717, Fax: +86-10-62737679, Email: dliangl@cau.edu.cn

Program Committee

- **Prof. Zetian Fu**, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn , Email: fzt@cau.edu.cn
- **Prof. Daolaing Li**, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn , Email: mailto:dliangl@cau.edu.cn
- **Prof. Minzan Li**, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn , Email: pact@cau.edu.cn

- **Prof. Chunjiang Zhao**, China National Engineering center for Information technology in Agriculture, 100089, Beijing, China, Email: zhaocj@nercita.org.cn
- **Prof. Dehai Zhu**, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn , Email: pac@cau.edu.cn
- **Prof. Songhuai Du**, China Agricultural University, School of Information and Electrical Engineering, 17 Tsinghua East Road, Beijing, 100083, P. R. China. www.cau.edu.cn , Email: songhuaidu@cau.edu.cn

A description of this session

Computer technologies are becoming more and more important for rural and agricultural development for all the countries, many computer systems have been developed to help agricultural scientists, extension workers, administrators, and farmers. Computer techniques has become a powerful means for modernization of agriculture, many countries established academic societies and research centers for Information technologies in agriculture. It is necessary for experts from developed and developing countries to exchange ideas together, the special session can provide a platform for experts from developed and developing countries to come together and get familiar with each other.
