Create Transparencies with Video
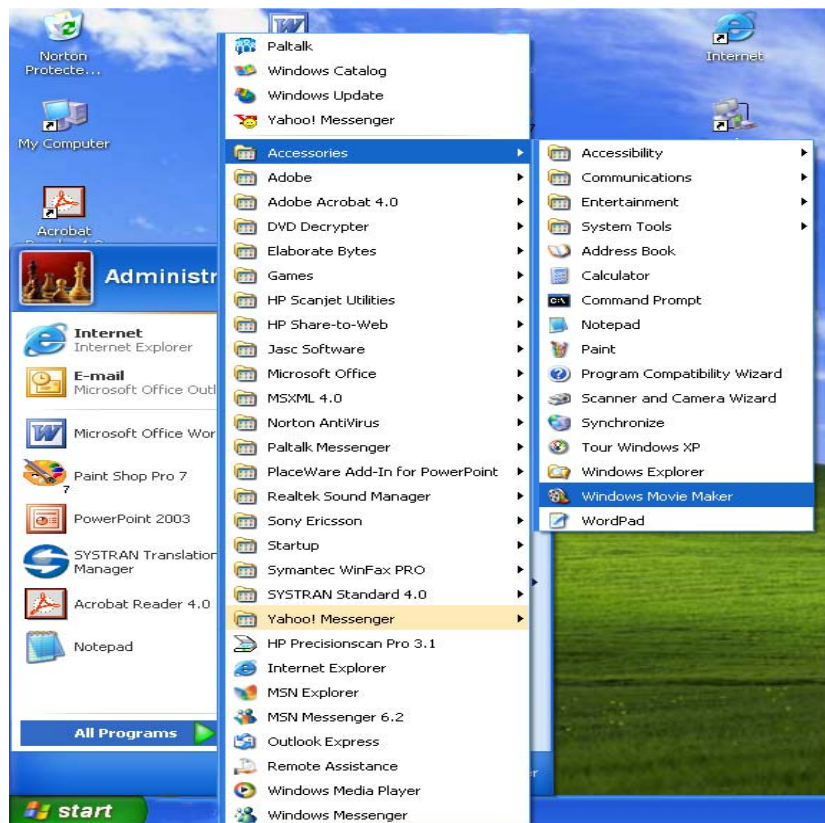

What you will need

1. Hardware
   a. Web Camera
   b. Microphone for Personal Computer

2. Software
   a. Windows Movie Maker
   b. Microsoft Power Point

Creation of Video

➢ Install the Web Camera and the software that comes along.

➢ Connect the microphone to the Mic port of your sound card.

➢ Run Windows Movie Maker from Start > All Programs > Accessories Windows Movie Maker.

➢ The first picture of the program will look like this
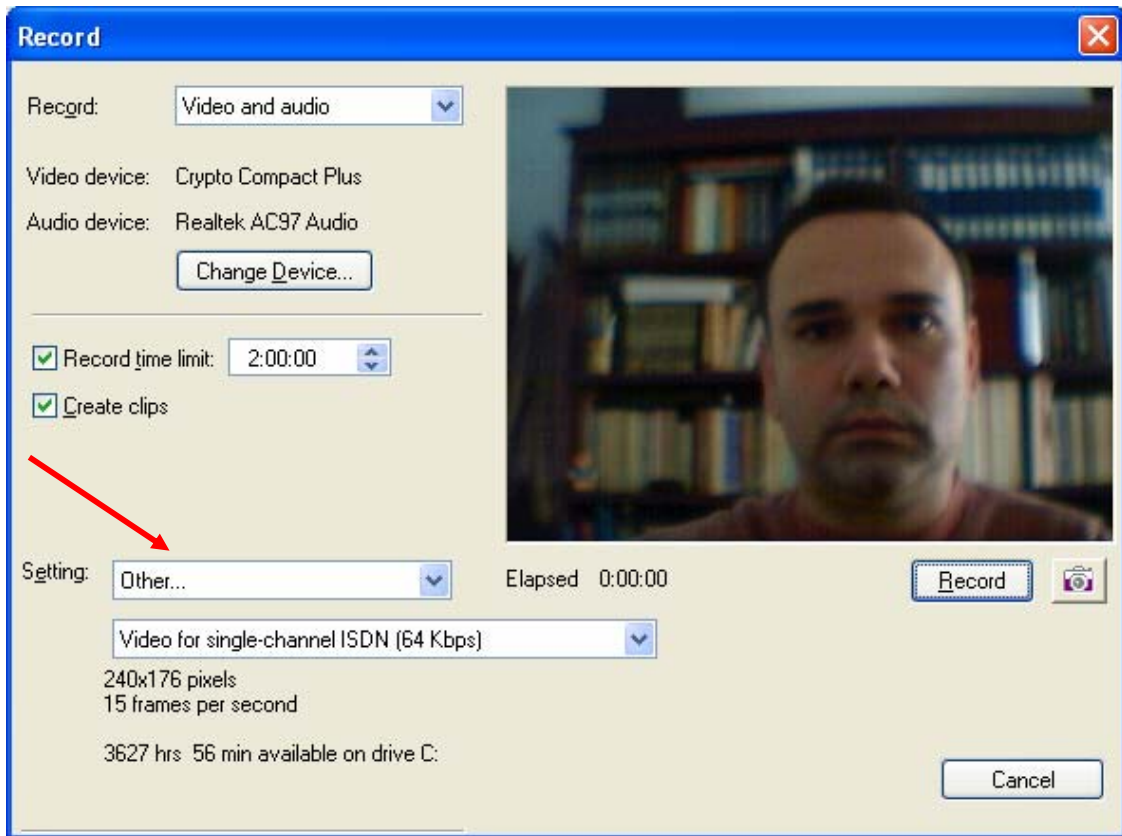

➤ Start recording by pressing the Record button

➢ At the window that pops up make the following configuration

➢ At the option Record choose Video and audio
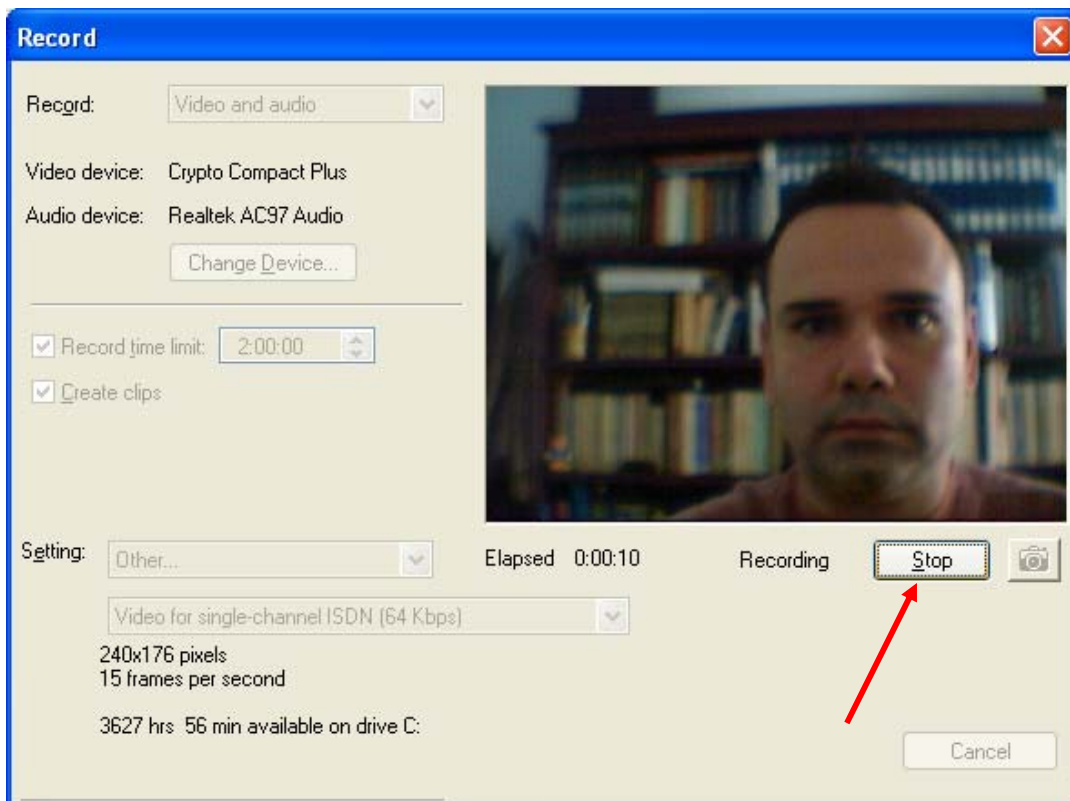

➢ At the option Setting choose Other…

➢ Then at the pull down menu choose Video for single channel ISDN (64Kbps)

➢ Now you are ready to start the recording of the video for the first transparency. Start by pressing the Record button.

➢ When you want to stop the recording press the Stop button.

➢ It is recommended to save the output video in a subfolder e.g. (C:\Conference\Presentation\Transparency001.wmv) etc.

➢ When you have created the videos for all transparencies open the Power Point Template we suggest to you (SuperNova).

➢ In the first transparency write the title of the paper and the name of the author.
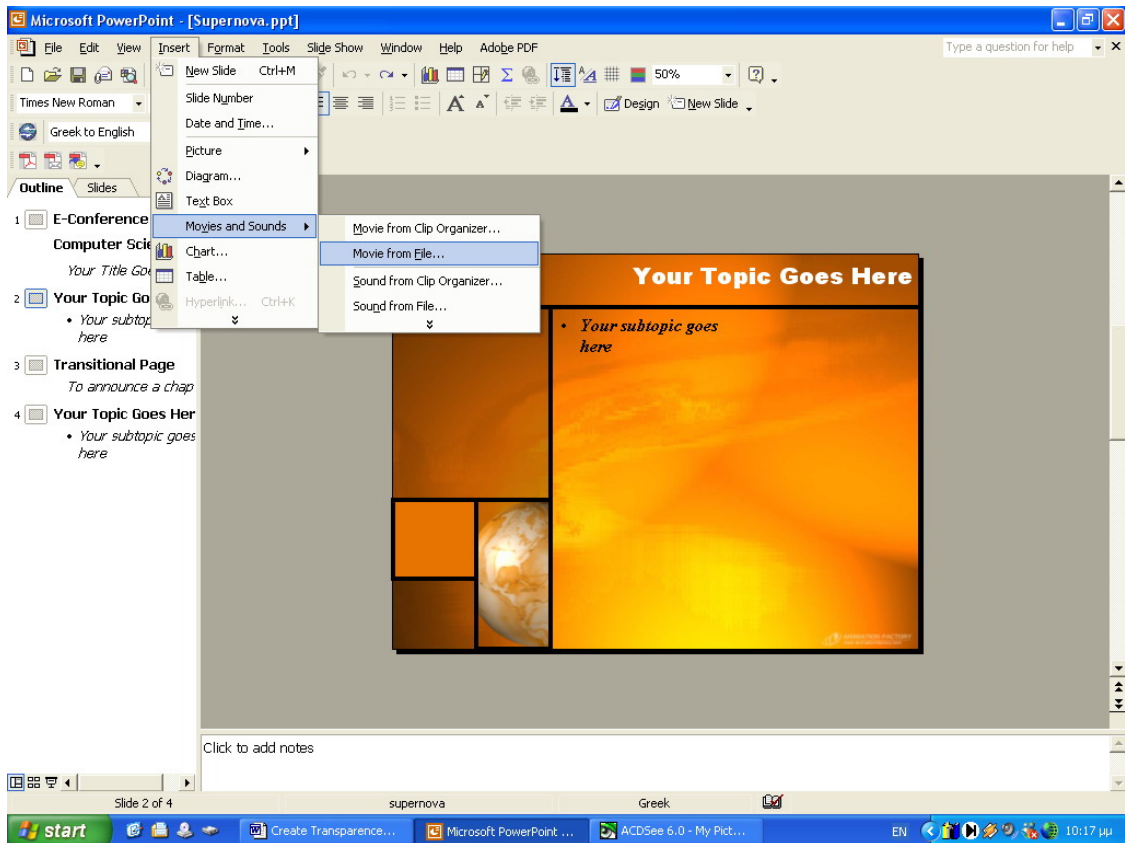

➢ In the second transparency you can write the topic of the section and the main points of the presentation.

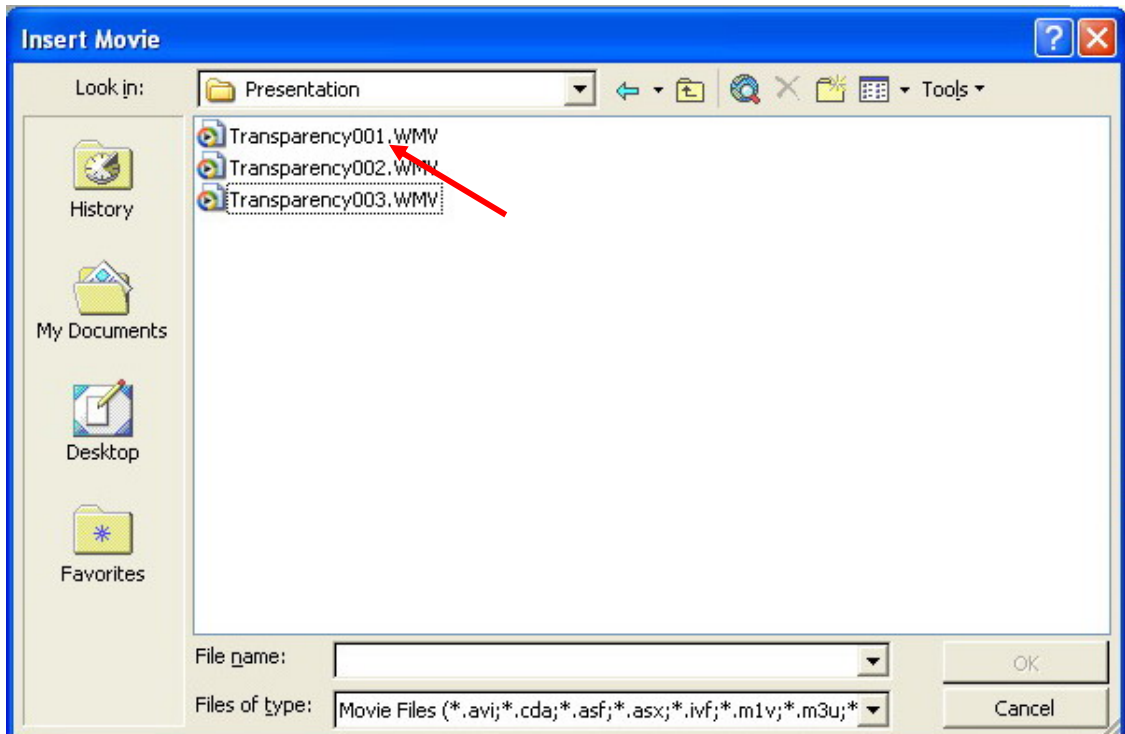

➢ At the left of the transparency there is space left for the participant to embed the video.

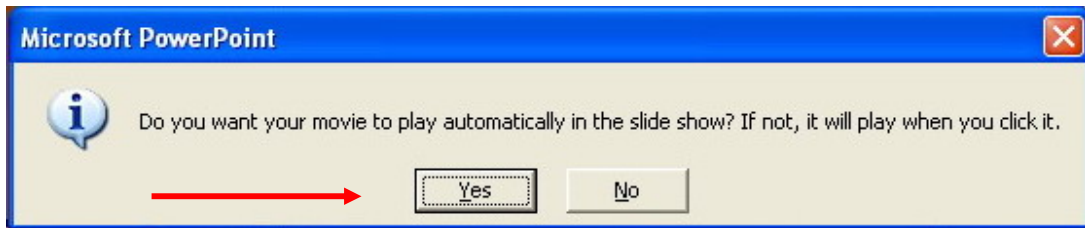

➢ Inside Power Point choose menu Insert > Video and sound > **Video from file…**

➢ Choose the video that corresponds to the specific transparency.

➢ At the question "Do you want your movie to play automatically in the slide show? If not it will play when you click it" answer **Yes**.

> Drag and drop the video to the correct location.

Initial   **Final**

> Present new chapters of your presentation through the next transparency.

> Alternatively instead of inserting a video you can insert sound only. Use Sound Recorder to capture the sound and insert it following the previous process.

Save the transparency and send it along with the paper.
